

## Project Status -2

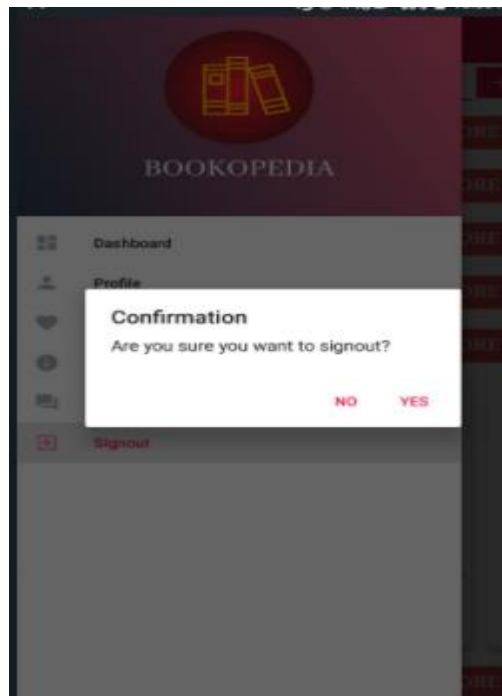

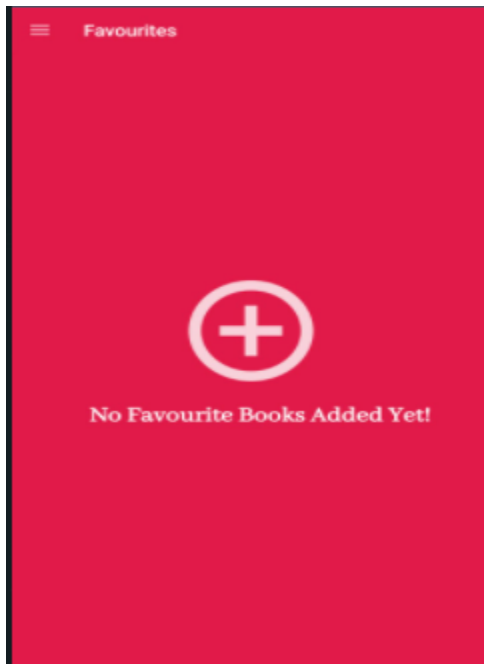

- Project Completed in percentage – 50%
- Project part completed in the last days:

In this we firstly created the menu-item for the navigation drawer. We consist of profile, sign-out, favourites, About-app as menu item. After that we created the fragments for each of the menu-item.

Then we have created the book description layout using XML.

- Some Screen Shots of the work done:

- Total Commits by the team : 60
- Work to be done in the upcoming week:

Connecting to the Google Book Api to get the books. After that we will parse the Jason Object that we have received from Google API as a response. And then display the result for the searched book.
